- ADDITIONAL REGULATIONS**
- If the mare returns in heat in an unusual way: **research other bacterial diseases on the cervix.**
 - If the mare **is changed from one stallion to another** during the course of the breeding season:
 - **New CEM test**
 - **New EVA test**
 - These should be **taken no sooner than 7 days** after the mare was last covered by the original stallion.
 - **Previous results must be submitted.**
 - If the mare is changed from boarding studs, **new tests (all of them) will be required.**
 - Additional swabs may be required in certain circumstances at the stallion stud manager's discretion.

***HIGH RISK REQUIREMENTS :**
Two negatives clitoral swabs (sinus and fossa) **AND** a cervical swab 7 days apart, taken during oestrus, after the 1st of January. Then follow the "Low Risk" regulations above.

PLEASE NOTE THAT HARAS DE BOUQUETOT IS FREE TO REFUSE A MARE ON A FOAL-HEAT
